

# grab bars

**Triple Chrome Plated Steel Series**  
**Plastic Series with Hidden Mounting System**

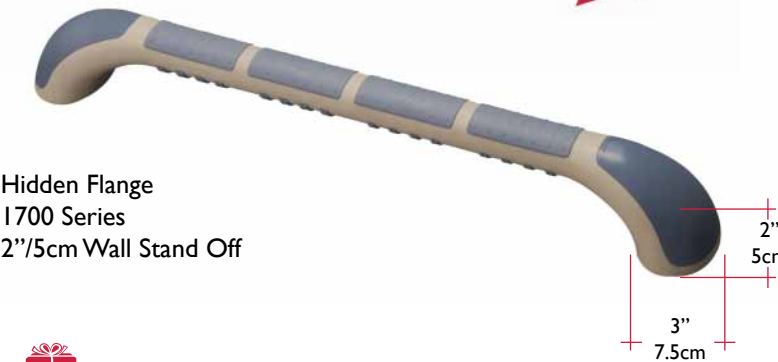

Our series of grab bars come in a variety of shapes and sizes to offer support and leverage in and around the bathroom. The steel series feature a diamond knurl finish that provides a sure grip even when wet and a rust resistant, triple chrome-plated finish that ensures years of trouble-free use. Our plastic series are made to the highest quality standards and feature a hidden mounting system with “sure grip” handles. All grab bars come complete with mounting hardware.

# bathtub rails

Our series of bathtub safety rails are designed to provide added stability when getting in and out of the bathtub. Manufactured under ISO9002, these safety rails feature an easy-to-use locking mechanism and convenient handle heights allowing for a seated grip position. Surprisingly easy to install, the steel rails are available in an attractive powder coated white finish and the plastic tub rails in a durable yet lightweight plastic that not only provides stability but assures hygiene with their waterproof construction. Non-skid rubber pads protect the tub wall and provide a sure grip.

# bath seats

Our bath seats are not only lightweight, but made to the highest quality standards. Model #1425 is made of durable polypropylene plastic and features four suction cup feet that allow weight to be evenly distributed to the stongest part of the bathtub, the bottom. Its contoured seat assists in personal cleaning and its all-plastic design assures stability. Its textured, non-slip surface provides a secure, raised sitting position for any tub size. Model #1000 features suction cup feet for stability and specially positioned holes for consistent drainage of water. Part of the LOOK modular series, all modular accessories can be used on this bath seat.

### WHAT'S THE DIFFERENCE?

**Injection Moulded** products are extremely durable and require ribs for added support. Because the plastic is injected into the mould at an extremely high pressure, these products are the most symmetrical and most uniform in design. In addition, the ribs produce a virtually unbreakable product.

**Rotation Moulded** products are created when a detergent-like powder is poured into a mould, put into an extremely hot oven and spun very quickly in varying directions. The centrifugal force turns the powder into a liquid that coats the walls of the mould creating an extremely durable, uniform and hygienic product (there are no joints or seams to trap dirt and bacteria).

# raised toilet seats

These one piece moulded raised toilet seats with antibacterial protection are designed to allow total immersion for cleaning. Available in four seat heights, they are easily fitted to a toilet in seconds. Removal is equally simple. The gently contoured seats are shaped to distribute a user's weight over a great area that will not only help to hold the occupant in position, but will also be durable enough to cope with the heaviest user. A wide frontal opening allows easy access for personal cleaning.

# bathroom aids and accessories

For assistance to and from the shower, our shower chair is ideal. It features 5" full swivel casters for easy movement and rear casters that have a built in locking mechanism for security. The nylon backrest not only allows easy access to the user's back, but is also easily removed for washing. The seat is made of a durable plywood base with cushioned vinyl padding and its frame is an anodized, non-corrosive aluminum with plastic armrests for comfort.

Our toilet safety frame is a welcome addition to any bathroom. Compact yet stable, it fits any toilet size as it adjusts in both height and width. Its unique two push button release system makes storage an easy task. The rust-proof aluminum mounting plate guarantees years of trouble free use.
